## ADDENDUM TO CURRENT LOCAL GRANTS APPLICATIONS

[HB 1147](#) of the 2024 Regular Legislative Session prohibits the installation, supply, sale, solicitation, or offer for sale of playground surfacing materials that contain more than 90 parts per million (ppm) of lead, or a component that previously had PFAS chemicals intentionally added to it, after October 1, 2024. It also prohibits a county, municipality, or any unit of local government from adopting less stringent regulations related to playground surfacing materials containing lead or PFAS chemicals. The law provides for enforcement through civil and administrative penalties, and directs the Department of the Environment to adopt regulations to carry out the law. The law applies only prospectively and does not affect any existing contracts that were ratified prior to October 1, 2024, for playground surfacing materials.

Local Grant Received:

- \_\_\_\_\_ Program Open Space (POS) Local
- \_\_\_\_\_ Community Parks and Playgrounds (CPP)
- \_\_\_\_\_ Local Parks and Playgrounds Infrastructure (LPPI)

Project Number: \_\_\_\_\_

Project Name: \_\_\_\_\_

Project Location: \_\_\_\_\_

As the authorized representative of the Political Subdivision, or certain nonprofit organization for specific LPPI projects, for where this project is located, I hereby confirm that the playground surface materials associated with this project do not include more than 90 parts per million (ppm) of lead, or a component that previously had PFAS chemicals intentionally added to it.
